

Content That
Sparks Possibilities

Strategically designed by a full staff of content development specialists, iN2L offers an expansive, targeted library of more than 4,000 content items to support the core dimensions of wellness. We make it possible to customize elder engagement for every use case. With a focus on regular content development, iN2L ensures new choices for meaningful programs and activities are always at your fingertips.

- 

Person-Centered
Make it easy for staff and residents to get to know each other by creating a personalized page for each elder.
- 

Social
Connect residents with each other, staff, and family members with easy access to familiar Internet and communication applications.
- 

Cognitive
Spark thinking with content designed to improve memory, attention, language, and executive and visual spatial brain function.
- 

Physical
Encourage movement and activity with videos, content, and activities ideal for fun, exercise, and therapy.
- 

Emotional
Engage residents with tools to support and encourage healthy, happy, and calm emotional well-being.
- 

Spiritual
Support a diverse range of faith groups and personal worship preferences with hundreds of spiritual experience applications.

Touch Screens for Enhanced Experiences

iN2L offers a variety of system options designed to meet the specific needs of your residents and community. Enhance social interaction by using larger systems for group activities. Bring our engaging content directly to individual residents or small groups with a movable system. Use tablets to connect with residents one-on-one or as a portable engagement tool for family visits.

75" System
Available in mobile (shown) and wall mount options.

55" System
Available in mobile (shown) and wall mount options.

23" System
Available in mobile FLEX (shown) and desktop options.

Tablet
10-inch tablet with protective kickstand cover. Available in WiFi and Cellular + WiFi options.

Engagement Package
Bike, flight, and drive simulators.

Creating Communities Where Seniors Shine

Possibilities, Fun, and Connection through Person-Centered Engagement

A Solution for the Whole Community, with the Elder at Its Heart

Everyone deserves to continue living a full life as they age—one with joy, purpose, and meaningful connections. iN2L brings people together, connecting seniors with what interests and fulfills them and enabling them to share conversations, interactions, learning, and fun with each other, their caregivers, and family members. iN2L helps create experiences focused on each individual elder that foster camaraderie, meaning, and a sense of purpose, positively impacting every member of the community surrounding them.

A simple press of a button on iN2L's touch screen provides easy access to applications that facilitate social interaction, cognitive and physical exercise, education, reminiscing, areas of interest, and memory support. With regularly updated content and suggestions for activity programming, staff can easily create opportunities for elders to find common ground, work together to solve challenges, and socialize with others. iN2L puts engaging ideas and activities at your fingertips, so you spend less time planning and more time focusing on what matters—interacting with residents.

65%
Improvement in resident mood¹

78%
Increase in social activity participation²

"I use iN2L to facilitate social events like trivia, sing-alongs, and game night. Our independent and assisted living residents look forward to coming together to socialize. It brings value to our activity programming and enables my team to provide engaging activities for our residents with less prep time."

Whether the goal is to reduce anxiety, engage to refocus, entertain to redirect, or stimulate reminiscing conversations, iN2L is an ideal tool for supporting elders living with dementia. On either our larger screen systems or our tablet, iN2L offers the ultimate person-centered experience, bolstered by purpose-driven content created by dementia care experts for a wide range of functional levels. Our intuitive interface provides flexibility in seamlessly moving from one content application to another to provide uninterrupted engagement.

Depression

2 Points
Average decrease in depression³

Quality of Life

2 Points
Average increase in quality of life³

"I use iN2L mostly one-on-one, either on the large touch screen or on personal tablets. The tailored content helps with reminiscing and gives us the ability to connect each resident with what's meaningful to them. That means less agitation, more calm and positive days, and a happier environment for all our residents and staff."

iN2L™

Therapy

Eye-catching, engaging, and expertly designed content combined with flexible wall-mounted and movable systems are ideal for encouraging patient participation in prescribed activities for speech, physical, and occupational therapy.

13% improvement in therapy goal attainment⁴

"iN2L's content is a great tool during our therapy sessions. It gives us the ability to tailor sessions to each resident and ensure they stay engaged and get what they need out of our time together."

iN2L enables families to be active participants in their loved one's engagement and daily life in the community. Family members can easily add personal photos, videos, and other memories to favorite iN2L activities and applications on their elder's personalized My Page. iN2L offers an easy way for even the youngest family members to engage with residents during in-person visits and remotely from home with tools such as video call.

"We loved being able to build a personalized page for Mom with her favorite games, songs, TV shows, family photos, and more. The first week after we moved her in, her caregivers video-called us every night so we could see how she was doing. Now, we use iN2L every week when we go visit. Her memory isn't great, but we have fun going through travel photos together—it's amazing when she sees a place she visited 50 years ago and immediately brightens up!"

78%
Improvement in quality of family visits²

144%
Improvement in staff-family relationships²

iN2L provides a differentiator for your community, highlighting how you truly deliver on the promise of personalized care and a high-quality resident experience. Demonstrating person-centered engagement with iN2L in pre-opening tours for new communities helps showcase planned resident engagement as well as build interest and waiting lists. iN2L also makes it easy to create personal profiles for prospective residents before a tour to give elders and their families a preview of community life.

"I have personally closed a sale on a walk-in tour upon getting a family member in front of the iN2L system."

— Jodi Guffee,
COO Radiant Senior Living

"Family members love when we show them how we use iN2L to create a personalized profile for their loved one. When they see how we get to know our residents and make sure we're focusing on their passions and interests, they can feel good about having their loved one move in."
